# PRESS RELEASE

## UNBOUNDED SOLUTIONS JOINS EMC CORPORATION SELECT SERVICES TEAM (SST)

*Elite program ensures customers receive highest standards in  
content management consulting services*

**Atlanta**, March 5, 2007: **Unbounded Solutions, Inc.** (USI), a leading enterprise content management solutions provider, today announced it has joined the Select Services Team (SST) program driven by EMC Corporation, the world leader in information infrastructure solutions. USI joins an elite group of partners worldwide that work closely with EMC?Software Consulting offering a heightened level of enterprise content management expertise to end users. As a member of the SST, Unbounded Solutions passed a rigorous selection process for which fewer than 10 percent of EMC partners qualify.

The EMC SST program allows elite, highly-qualified partners to join forces with EMC software consultants, providing customers with competitive rates, localized resources, and exceptional value. The SST program gives EMC customers a greater choice of service providers without compromising the primary goal of customer satisfaction. As a result, customers gain lower deployment costs, exceptional value, and decreased risk.

“I am pleased that EMC has chosen to recognize the work Unbounded Solutions has done with EMC software by selecting us to join the SST program,” said Vik Thadani, President and CEO of Unbounded Solutions. “I have worked with the EMC Documentum?platform for many years and this is the next step in what has been a very rewarding partnership.”

To qualify for the SST program, service providers must prove that they possess a full range of EMC software developmental and deployment expertise. SST partners demonstrate a history of deployment excellence, provide personnel formally trained in EMC offerings, and are committed to customer service.

“I am excited about joining the SST program,” said Michael Knight, Vice President of Unbounded Solutions. “Unbounded Solutions was selected, due in part to the number of experienced Documentum consultants that we have, as well as the number of customers that have derived value from our delivery capabilities. Joining the SST program will allow us to continue to provide customers a high standard in enterprise content management consulting and services.”
