

SharePoint 2010 Printing Services Solution

ONE-CLICK PRINTING FOR SHAREPOINT2010

Unbounded offers the only “one-click” and complete SharePoint printing solution on the market. As a Microsoft SharePoint-centric consulting and product development firm, Unbounded Solutions recognized a specific need to develop a printing feature within SharePoint— so that users may print directly from SharePoint, without being required to open a separate application.

For our clients, this has resulted in significantly increased productivity and immediate ROI. Documents can be accessed and collectively printed with a single click of the mouse— as opposed to employees having to devote excessive time and effort to locate, open, then print documents on a one-by-one basis.

Our SharePoint Printing Services Solution elevates your SharePoint printing capabilities to the list, folder and item levels— which enables users to print a wide range of documents with the simple click of a mouse, including:

- SharePoint Documents
- Discussion Threads
- List Items and Attachments
- Wiki Pages
- Calendar Events and Views
- Key Performance Indicators
- Reports

Other major features of the Unbounded Printing solution include:

- One-Click Printing of INFOPATH Forms
- Printing Multiple Versions of a Document
- Single Click Printing of all Documents
- Printing Entire Folder Contents

The SharePoint Printing Services Solution is compatible with both SharePoint 2010 and SharePoint 2007 and has been adopted by a wide range of clients throughout the globe, including:

- China International Capital Corporation
- Hawaiian Airlines
- Kellogg
- Toyota
- Revlon
- Swiss Parliament
- The State of Washington
- The United States Army
- The United States Senate
- The University of Copenhagen
- The University of Virginia, Darden School of Business
- Washington Headquarters Services
