

SharePoint Social Collaboration Pro

SOCIAL FOR THE ENTERPRISE

Unbounded Solutions offers the most powerful and user oriented solution for social collaboration for enterprises and organizations of all sizes. As a Microsoft SharePoint consulting and product development firm, we recognized the growing importance of social collaboration in the workplace and developed this innovative solution.

This groundbreaking product from Unbounded Solutions allows SharePoint users the ability to collaborate easily and effortlessly using the social interactions that they are used to from tools such as Facebook, LinkedIn, Google+, etc. Bringing these familiar concepts into SharePoint and the workplace provides users a familiar way to interact with their colleagues.

For our clients that want to improve the social capabilities of SharePoint and to provide a social tool for their employees, SharePoint Social Collaboration Pro from Unbounded Solutions provides the perfect solution. This powerful product allows knowledge workers to see the activity of their colleagues in a dynamic and easy to use “Wall” with an Activity Feed. Users not only see a feed of their colleagues’ activity but allow them to comment and interact with those documents and items that appear in the Feed.

The major features of the SharePoint Social Collaboration Pro from Unbounded Solutions are:

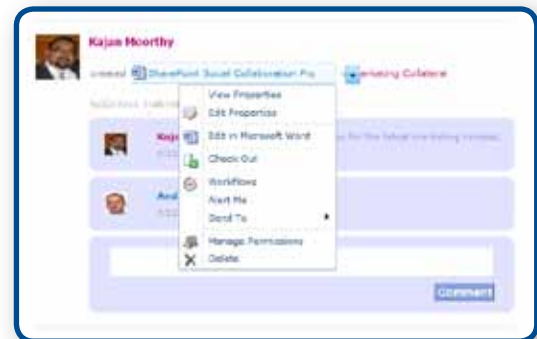

- View the status updates of your colleagues
- View an activity feed that lists the documents and list items that your colleagues have recently worked on
- Comment on your colleagues’ status updates and on the documents and items that they have been working with
- ‘Like’ the documents and items that are displayed in the Feed
- Perform all document and item actions directly from the Activity Feed such as View / Edit, Manage Workflows and Permissions, Check In / Check Out and many more...

This revolutionary product is designed for SharePoint 2010 and can be successfully integrated into any organization’s SharePoint environment.
